Parent Teacher Conferences

I look forward to seeing everyone at Parent Teacher Conferences! Please let me know if you cannot make it the date that you are scheduled for. We have set goals for the second half of the year and I'm excited to share the job your child is doing in class.

Spain Elementary

Thank you for bringing in books for the children at Spain Elementary. If you haven't yet sent in a book, we are hoping to have all the books by Friday, March 18. Any new or gently used children's book would be great.

Reading

We are learning about the Titanic! We are using this historical event to work on putting items in the proper sequence and to create a timeline of events. We will finish our timelines next week. We are very interested in this topic!

Writing

We have started working on our realistic fiction stories. We began by thinking of some interesting events that we could use to frame our story. We used the template Somebody, Wanted Something, But there was a problem, So they did this, and Then the problem was solved. Now that we have a few ideas, we will work on developing characters, setting, and fleshing out our events next week. We are off to a good start!

Math

We continue to work this week on studying fractions. We worked on adding and subtracting fractions, mixed numbers, and improper fractions. We also played some games reviewing concepts that we'd learned already such as fractions on a number line and equivalent fractions. Next week we will be working on some real world problem solving using fractions and really working on applying what we've learned so far.

Science

We are finishing up our study of light. We recently finished looking at how light interacts with color. We will finish our unit with a guest speaker (Mrs. Bergeon) joining us to demonstrate a cow eye dissection and learn how the eye processes light.
